Family Matters: Family Systems and Mental Illness

Although each of us is shaped by unique experiences, our family represents some of the most significant influences in our lives. In fact, family can serve as a fundamental source of support as well as a source of significant stress. However, our family systems can be greatly impacted by a diagnosis of mental illness. This training will explore the impact of mental illness on family systems. Specifically, this curriculum will highlight common challenges that family members may encounter when working with persons who are diagnosed with mental and emotional disorders.

Speaker

Julie Oates, M.Ed., LPCC-S, RPT-S is a licensed professional counselor and registered play therapist with supervisory endorsement. She has been the Executive Director for The Child Protection Center in Chillicothe, Ohio since 2007. She just recently stepped away from this role to complete her Ph.D., in counselor Education and Supervision from Ohio University with an expected date of completion in 2020. She has a wealth of experience in providing mental health treatment as well as organizational management. She received her Masters of Education in Clinical Counseling from Ohio University in 2001.

Objectives

At the conclusion of this workshop, participants will be able to:

• Increase knowledge of family systems theory

• Develop strategies to assist families in the identification and problem solving of common pitfalls and misconceptions within the familial system especially with family members impacted by mental illness

• Discuss how mental illness can impact family systems

• Identify how cultural and external factors hinder abilities of service providers to be able to assist the family
